

# Apartment Training Check List

Make your student's landlord smile! Teach your student these basic  
"survival skills!"

## Self Care

Laundry – Three loads of laundry WON'T dry in one cycle (also, that little door on top of the dryer – it's the lint trap – clean it out once in a while)

Dishes – Please do not use dish soap in the dishwasher

Basic Housekeeping – how to clean a toilet and bathtub (they usually aren't black)

## Emergency Survival Skills

Flashlights are great to have

What to do if the heat doesn't work in the winter

Setting the AC at 50 degrees when it is 40 degrees outside is not a good idea.

Shut-off valves – those wondrous tools that turn off water to sinks and toilets minimizing water damage

How to use a plunger (and what kind to buy)

## Not-So-Common Sense:

Doors have locks for a reason – use them!

Batteries don't flush (neither do candles, Q-tips, razor blades)

Sprinkler heads are not clothes hangers

Teaching your student these basic skills may save your student (or you)  
thousands of dollars in damages!!!! .
